

Dear.....,

I hope you are doing ok in this tumultuous and difficult time for so many.

I know you will be feeling the burden of the Cost of Living Crisis with so many struggling in our community.

I am writing to you from the Leeds Craftivists where we are campaigning on the Cost of Living Crisis and asking the government to prioritise a sustainable future for everyone by investing more in renewable energy. Greater UK renewable energy is a long term solution to avoid the rising costs we have seen recently.

*Pick a couple of facts to share from Alice's presentation*

I care deeply for all those struggling now and feel the responsibility to current and future generations to take care of our precious planet too, as I am sure you do as well. Green energy offers us a solution that could create the future we all hope is possible, a fairer, greener society that serves us all.

We ask you to raise this with the government again and reinforce what an important issue this is to the people of *Leeds Central*.

Thank you for all you do for this community, please keep speaking for those who are struggling.

Best wishes,

Anna
